## APPLICATION

### Substrate preparation

- No special substrate preparation is required due to purpose of the spray paint.

### Product preparation

- Before use shake the container vigorously. Shake for at least 3 minutes till hearing a characteristic sound of balls moving in the container.

### Painting

- Apply from the distance of 25-30 cm.
- Coat drying and setting time depends on temperature and air humidity; during unfavourable conditions may be extended.
- Painting (marking) can be conducted by holding the container in any position.
